AMENDMENT

In the Claims

53. (Twice Amended) A computer system capable of mirroring information in a remotely disposed target storage system that is coupled to the computer system via at least one communication link that includes at least one wireless connection, the computer system comprising:
a central processing unit (CPU) coupled to the at least one communication link;
a source storage system that is coupled to the CPU to store information written from the CPU; and
a controller, responsive to the information being written from the CPU to the source storage system, to transfer at least some of the information written from the CPU into the [network cloud] at least one communication link so that the at least some of the information can be mirrored in the target storage system.
